

BOLON

7

TIMES OR MORE

Our flooring and rugs are made with recycled material and can be recycled again. The PVC in our products can be recycled seven times or more. The chalk can be recycled infinite times.

100%

RECYCLABLE FLOORING

All our flooring is 100% recyclable in our own factory, and we are currently working on a take-back solution to offer in the future.

HEALTH-FRIENDLY PRODUCT

The excellent maintenance properties help quality of life for people that suffer from allergies.

68%

RECYCLED MATERIAL

Our products consist of 68% recycled material: BIO-sourced PVC produced by using pulp and paper industry waste, recycled PVC and chalk made from production waste from PVC and marble slab products.

100%

CERTIFIED

All our products are certified in different ways. We have EPDs for carbon footprint, environmentally labelled PVC, and certification for emissions during use.

NO CARBON OFF-SET IS INVOLVED

0%

CLIMATE IMPACT

Our products consist of recycled and BIO-sourced material that gives us a product with zero climate impact. Our factory runs on 100% renewable energy, which results in a zero climate impact production.

0%

PRODUCTION WASTE

All waste generated in our factory is either recycled or energy-recovered, with zero waste going to landfills from production.

100%

HAZARDOUS FREE

Free of phthalates and heavy metals. Free of any risk chemicals. A key factor towards circularity.

NO GREEN COLLECTION

We have the same high environmental performance in all collections and products. The combination of environmental performance, a uniquely high number of recycled materials, and zero climate impact put us globally in a lead position.

LONG-LASTING PRODUCTS

Our floors come with 10-15 years warranty. They need no special treatment during their full lifespan.

100%

RENEWABLE ENERGY

Renewable energy runs all production, and 25% comes from our solar panels on the factory roof.

WE ARE PUSHING RECYCLING IN THE DESIGN INDUSTRY
